Senior Fullstack Engineer experienced in architecting scalable web applications, design systems, and data pipelines. Played a key technical role during Pareto's growth phase into managing frontier AI projects generating over \$12M in business impact. Expert in TypeScript, React, Python (Django), GraphQL, and cloud services.

Skills

- Typescript, React, Design Systems, Python, Django, PostgreSQL, AWS, Docker.

Work Experience

Pareto . Senior SWE[React, Python, Django, AWS] **Stanford Jan, 2024 - Feb 2026**

- Authored and reviewed foundational RFCs/ADRs defining backend architecture for financial payout processing, task distribution engines, and file-upload services.
- Led the frontend team in exposing scalable API patterns, ensuring design system updates and client interfaces synchronized cleanly with backend endpoints.

360dialog . SWE[React, TanStack Query, Webpack, Babel] **Berlin Jan, 2023 - Dec 2023**

- Built interactive conversion tracking, attribution, and reporting UI dashboards for 360Pilot. This enabled advertisers to visualize downstream chat conversions, ad spend metrics, and ROAS in real time.

Pareto . SWE[React, Storybook, Graphene, Relay] **Stanford May, 2021 - Jan 2023**

- Standardized developer workflows and package builds by introducing automated CI/CD releases and monorepo tooling.
- Co-designed and implemented GraphQL APIs for our AI/LLM training data platform.

Kakbima . SWE[GraphQL, Apollo Client / Federation] **Nairobi Aug, 2019 - May, 2021**

- Designed and launched an open GraphQL API and a design system for an insurance platform, serving insurers, brokers, agents and customers. This onboarded 3 major insurance carriers immediately at launch.

Legibra . SWE intern[Javascript, Shopify] **Nairobi May, 2019 - Jul, 2019**

- Developed an e-commerce platform featuring a virtual try-on module using core Web APIs for real-time image rendering.

Education

Jomo Kenyatta University of Agriculture and Technology

Nairobi, 2017

Bachelor of Science in Mathematics and Computer Science
